My time is important.
I always choose to use it
on the very best things.
Education is one of them

PROFESSIONAL BACHELOR (BA) IN

WEB DEVELOPMENT

Get ready for a career working with web development on an advanced level.

THE BA IN WEB DEVELOPMENT

The Professional Bachelor in Web Development is a three semester extension to the AP Degree in Computer Science or the AP Degree in Multimedia Design and Communication.

This bachelor degree gives you advanced skills in programming, web communication, and interface design.

As a Bachelor in Web Development, you are able to work creatively with the design, and construction of web applications of all sizes. You get the skills to build web systems from scratch using object-oriented interactive development environments (IDE), content management systems (CMS) and relational databases. You also learn how to use and analyse methods for manufacturing advanced media technology products.

The programme is directed specifically at the development of web technologies in a wide range of applications and a variety of distribution platforms preparing you for many different types of jobs.

You'll learn about:
- Back-end or front-end programming
- Databases and xml programming
- Interface design and digital aesthetics
- CMS and development platforms
- Advanced media technologies
- Web communication and sociology

Internship
The programme includes an internship in a company in Denmark or abroad. The internship gives you the opportunity to use your new skills and get valuable training in an actual workplace.

Language
The programme is taught fully in English. You will be part of an international environment and will have the opportunity to meet students from Denmark, other European countries, and other parts of the world.

Admission requirements
The 1½-year study programme is open to graduates from the 2-year AP Degree in Multimedia Design and Communication, the 2-year AP Degree in Computer Science and students with similar qualifications.

Tuition
The programme is free for students from EU/EEA countries or Switzerland. Please contact us for more specific information.

How to apply
Please find the application form at www.iba.dk, fill it in and send by e-mail to apply@iba.dk.
